CALIBRATION IN FORCE

THE CALLS THAT CARRY INFORMATION

Most Parliament votes pass, and a topic-blind baseline predicts that. These are the items where a recorded committee vote gives the engine something the baseline does not have — including every **contested** call of the week.

A10-0161/2025 · AGRI · Ordinary legislative · 1st reading

Strengthening of the position of farmers in the food supply chain

Céline Imart

ADOPTED 90% predicted yes-share

AWAITING VOTE

flip lever – no single ep group can swing it – decided on the floor

A10-0147/2026 · DEVE · Own-initiative report

Reinforcing development cooperation to address irregular population movements and their root causes in partner countries

Lukas Mandl

ADOPTED 76% predicted yes-share

Plants obtained by certain new genomic techniques and their food and feed

Jessica Polfjärd

POSITION STANDS

68% predicted yes-share

AWAITING VOTE

Rule 68 — amending or rejecting
the Council position needs an
absolute majority of members

predicted against: threshold: **361**
232 seats of 720

Predicted: *the Council position stands* — the
act is deemed adopted.

flip lever — epp is the pivot
group (188 seats)

THE FULL LEDGER — NOTHING CHERRY-PICKED

All 26 votable items on the published draft agenda (2026-05-26), each stamped with the rail that produced it. Items marked *baseline* share identical numbers by construction — they are coverage, not insight, and we say so.

REF	MOTION	PROCEDURE	PREDICTION	RESULT
A10-0069/2026	Adjustment of customs duties and opening of tariff quotas for the import of certain goods originating in the United States of America (Urgent procedure (Rule 170) requested.)	Ordinary legislative • 1st reading	ADOPTED • 68% BASELINE	AWAITING VOTE

DECLARED OUT OF SCOPE, IN ADVANCE

- Rule 150 human-rights resolutions (Thursday): topics not yet defined on the draft OJ.
- Digital Omnibus on AI (A10-0073/2026): debate only on this OJ — no vote slot listed.
- Possible Rule 170 additions: the final agenda may add votes after this ledger is cut.

SCORECARD

Grading opens when the votes close.

Every line above is frozen in git before the session. Afterwards each is scored against the official results by pre-registered rules — outcome hit or miss, share error, and the contested subset broken out — next to the one number that keeps us honest: *a coin with ADOPTED printed on both sides gets roughly nine in ten EP votes right*. We claim skill only where the committee rail beats that coin and our own published baseline.

HOW TO READ THESE NUMBERS

1. The percentage is a *predicted seat share* — the expected share of votes cast in favour — not a probability of adoption.
2. Each group gets a predicted yes-rate: its recorded committee vote where one exists, its historical average otherwise. Seats × rates, summed: that is the whole model. No discretionary overrides.
3. The second-reading item is a threshold call: overturning the Council position takes 361 of 720 members, not a simple majority.
4. The flip lever names the one group that could reverse the predicted outcome by moving its own voters — the pivot, not the most divided group.
5. Grading rules were committed to git before the session: pairing, metrics, and subsets are frozen in `praevisa/plenary_forward.py`. The ledger is append-only.
