Graded in public after — rules pre-registered in code before the votes; grading opens 19 June 2026.

26 votable items · cut 2026-06-10 at engine rev f859218 · draft agenda of 2026-05-26 (OJ-10-2026-06-15-SYN) · alpha=1.0

*committee rail = Stage-A per-group committee->plenary map (ep_flip, shrinkage alpha); prior rail = baseline_A per-group plenary historical mean (party arithmetic). Seat-weighted, abstention-ignored, NI excluded from the tally. ***II items predicted against the Rule-68 absolute-majority threshold.*

4 items carry a committee/opinion signal (3 contested — the calls that carry information); the rest ride the published party-arithmetic baseline. Items marked CONTESTED had a committee yes-share below 75%.

Declared out of scope, in advance

- Rule 150 human-rights resolutions (Thursday): topics not yet defined on the draft OJ.
- Digital Omnibus on AI (A10-0073/2026): debate only on this OJ — no vote slot listed.
- Possible Rule 170 additions: the final agenda may add votes after this ledger is cut.

How this will be graded

The grading rules are pre-registered in `praevisa/plenary_forward.py` and pinned by tests committed before the session: official roll-calls from the HowTheyVote bulk export, paired by procedure reference, report number, or normalised title-token containment (never exact-string matching; Rule-71 mandate votes excluded); outcome hit/miss and yes-share error per item, per-group observed rates where available; the second-reading item is graded as the Rule-68 threshold call (the Council position is overturned only by 361 votes FOR a challenge). The scorecard separates always-ADOPTED, the baseline rail, the committee rail, and the contested subset — skill is claimed only where the committee rail beats both comparators.

Integrity: the ledger is git-committed before the session opens; grading is append-only and refuses to run before 19 June or to score any vote not strictly after the ledger's cut date.
